**The At-Risk Registers Integrated into primary care to Stop Asthma
crises in the UK (ARRISA-UK) trial: progress and plans for future
work**

The At-Risk Registers Integrated into primary care to Stop Asthma crises in the UK (ARRISA-UK) study is an ongoing UK-wide cluster randomised trial involving 270 GP practices that is investigating the effectiveness of a GP-practice level intervention in reducing severe attacks amongst high-risk asthma patients. Come and hear about study progress and plans for process evaluation work being led by members of APEX.
