

Dr Sam Merriel

Clinical Senior Research Fellow, UEMS

“Multiparametric magnetic resonance imaging for prostate cancer diagnosis in primary care”

- The recently updated NICE guidance *Prostate Cancer: Diagnosis and Management* recommends that all men with suspected prostate cancer should have an mpMRI prior to a biopsy. Sam is exploring the potential impact of mpMRI on prostate cancer diagnosis in primary care and will be presenting some of his early PhD findings at this seminar.

Wed 18 March 2020, 13.00-14.00

Room JS07, Smeall Building, St Luke's Campus
Join us from 12.30 for lunch in the downstairs lobby of Smeall Building.

Dr Jess Bollen

Associate Research Fellow, UEMS

“A randomised controlled trial of a community-based physical activity intervention to prevent mobility-related disability for retired older people”

- The REACT (REtirement in ACTion) study assessed whether a 12 month group based physical activity programme with an educational component was successful in delivering the associated health benefits. Jess is currently in the process of determining the effectiveness of the REACT intervention.
